Tamil Nadu, India.

Dear Professor,

I am very happy to inform you that I hereby, extend our collaboration with your research group. First, let me thank you for introducing potential faculty and students to my group. As you know pretty well, we published research papers and deposited several bacterial DNA sequences in NCBI database. I am looking forward for long term research collaboration with your group. It will be highly beneficial to the students as well as faculty in getting exposure to advanced techniques and productive publications. Also, it could be useful for collaborative research projects between our groups.

Thanks and Regards

(Dr. S. KAMALAKANNAN)

Dear Professor,

Sub: Kyungpook National University -Acceptance of research collaboration with your institute in the field of Environmental nanotechnology research – Reg.

We would like to express our willingness to work in collaboration with you in environmental nanotechnology field, in particular synthesis of nanoparticles and their applications in synthetic dye decolonization. Our institute recognizes that academic collaboration would be of mutual benefit and provide strengths in research, education and their mutual interest in engaging themselves in academic cooperation with Department of Biotechnology, Mahendra Arts and Science College (Autonomous), Kalippatti, Namakkal, Tamil Nadu, India.

The purpose of this collaboration is to promote cooperation in bio-nanotechnology research between the Department of Environmental Engineering, Kyungpook National University, Daegu, South Korea and the Department of Biotechnology, **Mahendra Arts and Science College (Autonomous)**, Namakkal, Tamil Nadu, India, it is agreed that your institute will be credited for your involvement in the program. This collaboration is a part of scientific input in the dissemination of new knowledge, supply requested research materials and technical expertise for this work and no funds or grant will be released from our institute. The project evaluators will contact both of us directly with brief online surveys about the research project.

Looking forward to joining hands with you.
